PROFILE

Motivated and detail-oriented aspiring software developer with strong foundational knowledge in Python, Django, HTML, CSS, and MySQL. Skilled in developing dynamic web applications using Django framework and building responsive front-end interfaces. Capable of integrating front-end and back-end systems, managing databases, and writing clean, maintainable code. Passionate about learning new technologies and solving real-world problems through code. Seeking an opportunity in the IT industry to contribute to meaningful projects and grow as a full-stack web developer.

PROJECTS

1.Personal Portfolio Website-(Built using HTML, CSS,basic JavaScript and GitHub for version Control)

I have designed and developed a responsive personal portfolio website using HTML, CSS, and basic JavaScript. This website showcases my profile as a B.Tech student, highlighting my skills, education, resume, certifications, and interests in the IT field. The main objective of this project is to build a professional online presence and to demonstrate my web development skills.

Key Features:

- Clean and modern UI design using HTML & CSS
- Responsive layout for mobile and desktop
- Sections for About Me, Skills, Education, Resume, Projects, and Certificates
- "View Certificate" links integrated for easy access to digital achievements
- Email contact option using mailto: link
- Hosted locally or on GitHub Pages

2.UiPath Automation Bots - (Tool used UiPath Studio, Notepad,ChatGPT,GoogleCrome)

Developed and deployed three automation bots using UiPath Studio:

- **Bot 1:**Automatically writes and saves a "Hello" message in Notepad.
- **Bot 2:**Takes a city name input and fetches real-time weather data in Celsius.
- **Bot 3:**Takes a topic as input, retrieves relevant information from ChatGPT, and saves the response in Notepad.

Gained experience in RPA workflows, data input/output handling, and API integrations.
